Non-native (but Florida-friendly and edible): Basil, amaranth, dill, fennel, parsley, and Mexican tarragon

Tips for creating pollinator-friendly landscapes: Use native plants, preferably locally sourced. Use regional Florida ecotype seed. Select a mix of plants for year round blooming. Avoid tilling or otherwise disturbing soil. Avoid or minimize pesticides and herbicides. Taken from Florida Association of Native Nurseries Native Plant and Service Directory, Fall 2013-2014
